## Water Treatment Systems

# WC Series

The WC Series of high volume water cannon systems act as water blasters to pre-wash heavy equipment and vehicles. Each unit features a tough mud blasting pump system with centrifugal separator and is designed to make workloads quick and easy.

Ideal for rental yards, lumber yards, mining operations, heavy equipment dealers, and solid waste handlers, the WC Series has the power and precision for the most difficult applications.

# High Volume Water Cannon System

The High-Volume Water Cannon System acts like a water blaster, pre-washing heavy equipment and tracked vehicles. The tough, high gallon-per-minute centrifugal system blasts away mud and dirt allowing for an easier and less timely workload during the pressure wash cycle.

**Typical applications include:**

- Rental Yards
- Lumber Yards
- Mining Operations
- Heavy Equipment Dealers
- Solid Waste Haulers
